MYTILINEOS' Chairman & CEO Evangelos Mytilineos elected new President of Eurometaux

Brussels, 13 October 2022: Evangelos Mytilineos, CEO of Greek aluminium and energy company MYTILINEOS, was elected President of Eurometaux (Europe's metals association) at the association's General Assembly. He succeeds Mikael Staffas, CEO of Boliden, who has held this post since October 2018.

Guy Thiran, Eurometaux's Director General, commented: "I am thrilled to welcome Evangelos Mytilineos as our new President. His rich experience in the aluminium and energy sectors makes him exceptionally well placed to lead our industry through today's unprecedented energy crisis. At a time when Europe commits to improving its strategic autonomy for the metals and minerals required in the energy transition, it's fitting that we will be headed by a real industrial leader with full supply chain operations from the mine to product.

"At the same time, we thank Mikael Staffas for his excellent leadership over the past four years. Under his Presidency, Europe's raw materials security has risen right to the top of the EU's political agenda. Mikael has led by example to show that high sustainability standards will be our industry's global differentiator, and tirelessly emphasized the need for joined-up EU policies to ensure competitiveness".

Evangelos Mytilineos, MYTILINEOS' Chairman & CEO, commented: "I am honored to be elected as President of Eurometaux, during a crucial period both for Europe and for our industries. The next two years will be critical not only for the future of the non-ferrous metals industry, but for the European economy as well. Our top priority will be to push for adequate and globally competitive energy costs for all. This is fundamental to securing jobs, social stability, and economic growth around Europe"

"We will work hard; I'm determined to put in personal effort, and I'm sure I can rely on the entire Eurometaux team and our members, for us to succeed in our common goals. My intention, as newly elected President, is to reach out to policy makers and work for immediate and efficient actions. And in line with Eurometaux's track record, we'll always bring concrete proposals to the table for solving the problems we face, that will help revive our industry and ensure our global competitiveness contributing to the EU's climate agenda".

Over the next two years, the association has prioritized work with European and national governments to mitigate the immense problems faced by metals producers during today's energy crisis – which has already taken 50% of the EU's aluminium and zinc capacity offline, and 30% for silicon. Eurometaux will also lead industry work on the EU's upcoming Critical Raw Materials Act and its actions to mobilise investments into strategic European mining, refining, and recycling operations with high sustainability performance.

Other top priorities include the reform of Europe's chemicals legislation (REACH), new EU due-diligence policies, Carbon Border Adjustment Mechanism, and the sustainable products framework.

About Eurometaux: Eurometaux is a trade association representing the collective European non-ferrous metals industry, including miners, smelters, refiners, fabricators and recyclers of the base metals, precious metals, and minor metals needed for the twin transition. In total the industry employs 500,000 people across over 900 facilities, with an annual turnover of €120bn.

About MYTILINEOS: MYTILINEOS one of Greece's leading industrial and energy companies with more than 4,800 direct and indirect employees and ownership of the largest vertically integrated aluminium producer in the EU. In 2021, it became the first company to set solid carbon footprint reduction targets, including a reduction of direct and indirect CO2 emissions by 30% by 2030 compared with 2019 levels, and net-zero emissions by 2050.
